HANDLL.AI · RED BANK, NEW JERSEY · SAMPLE WORK, SORTED INTO LANES

Handll engineers the systems that answer, remind, book and file, so nothing slips while your team is with clients.

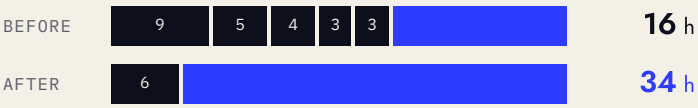

ANSWERED	Portal lead, 11:47 pm → first reply in 0:39	Missed call, Morales family → text back sent
BOOKED	Showing request → Sat 10:00 am, invite sent	Rate moved 0.125 → 214 borrowers re-scored
FILED	Documents, Ken Ito → filed to the loan file	41 renewals due → reminders queued

THE PROBLEM

Your best people are serving the software.

Leads wait overnight. Follow-up nobody owns. Renewals run on memory and past clients go quiet. Handll maps where the hours go, your **Compression Points**, then builds systems that take it off your team.

WHERE A 40-HOUR WEEK GOES — SAMPLE · ONE AGENT

- **Manual work**, in hours: lead follow-up, re-typing records, chasing documents, scheduling, status updates
- **Client time**, up 18 hours a week

Illustrative figures. Your own are mapped in discovery.
